For Immediate Release

September 10, 2024

VisionOS App innovates Public Speaking Experience

SpeakEZ is an immersive app that allows users the opportunity to simulate a variety of public speaking situations. Utilizing the technology of the Apple Vision Pro, SpeakEZ has been developed to allow users to improve their skills of presenting, pitching and performing in a natural and non-distracted manner.

For students and young professionals, proper public speaking skills are crucial. With this app, designed for both students and non-students, users will receive a comprehensive array of features that optimize public speaking practice.

With SpeakEZ, users can utilize timers to detect speech length & pacing of speech, while simultaneously referencing guiding presenter notes. SpeakEZ also can detect filler words said by the presenter. With gesture features such as eye tracking and bodily motion detection for an optimal public speaking experience, SpeakEZ will give users a space to receive thorough practice as they maximize their skills along with boosting their confidence.

"Public speaking is something we have all done and will do in the future. Using SpeakEZ has truly allowed me to work out any issues that I see reoccurring in my presentations," says spokesperson Whit Pope.

"Practicing with SpeakEZ feels a lot more similar to giving my actual presentations. Usually I practice by just memorizing what I will say, but SpeakEZ gives me the full experience," said a valued customer.

SpeakEZ can be found in the Apple app store and can be set up in minutes. You must log in, choose which mode you would like to present in and activate the timer or notes setting.

Our team is dedicated to combining human skills with technological advances to improve ourselves and our future.

FAQs

What is SpeakEZ?

1

SpeakEZ is an Apple Vision Pro application that allows you to practice your public speaking in a virtual environment. The application provides your feedback on the qualities of your speech, such as the speed and quantity of filler words.

What makes the Apple Vision Pro unique?

2

The Apple Vision Pro is a spatial computer that integrates digital media into the real world. Apple Vision Pro uses hand, eye, and speech tracking so you can interact with this unique environment.

What devices is this application compatible with?

3

As of now, this application is only compatible with the Apple Vision Pro.

Is SpeakEZ a productivity app?

4

Yes, the purpose of SpeakEZ is to improve public speaking skills and to increase confidence through practice in a virtual space that emulates a real-world environment.

Can the Apple Vision Pro handle this application?

5

Yes, SpeakEZ utilizes the speech and eye tracking functions of the Apple Vision Pro to give feedback on your public speaking.

FAQs

6

What makes this application unique?

Unlike other productivity applications for Apple Vision Pro, SpeakEZ provides feedback on speech qualities such as speed and quantity of filler words, making the application a useful tool for practice and improvement in public speaking.

7

Who can use SpeakEZ?

Anyone who wants to practice public speaking can use SpeakEZ!

8

How much does this application cost?

This application is free to download on the App Store for use on the Apple Vision Pro.

9

What can you use SpeakEZ for?

SpeakEZ is primarily used for practicing public speaking, but it can also be used as a memorization tool when practicing lines.

10

What is the virtual environment for SpeakEZ?

The default virtual environment for SpeakEZ is a stage in a theater. We may develop more virtual environments in future application iterations.
